Career Objective

Motivated Computer Science graduate with strong foundations in software development, databases, and system design. Seeking an entry-level software engineering role to apply problem-solving skills and hands-on project experience in building scalable and reliable applications.

Education

- **American International University-Bangladesh (AIUB)** — Dhaka, Bangladesh
  B.Sc. in Computer Science and Engineering (Major: Information Systems) — *Feb 2022 – Feb 2026*

Experience

- **Codveda Technologies** — Remote
  Full-Stack Development Intern — *Feb 2026 – Apr 2026*
  - Developed and integrated front-end and back-end components for modern web applications using contemporary full-stack development practices.
  - Built and integrated RESTful APIs to support application functionality, data communication, and seamless interaction between frontend and backend systems.
  - Worked with databases for data management and contributed to improving database performance, reliability, and application efficiency.
  - Implemented, tested, and debugged web application features to ensure functionality, reliability, and a consistent user experience.
  - Applied full-stack development practices to build scalable, maintainable, and user-friendly digital solutions.
  - Collaborated on diverse software development tasks involving modern web technologies, version control, API development, and software engineering practices.

Projects

- **E-Commerce Platform — MERN Stack** **GitHub**
  - Developed a full-stack e-commerce application using the MERN stack with User, Seller, and Admin roles.
  - Implemented JWT-based authentication and role-based access control for secure user and seller operations.
  - Developed seller product management functionality and integrated MongoDB for user, product, and application data.
  - Built and integrated RESTful APIs using Node.js and Express.js with the React.js frontend.
  - Implemented core e-commerce features including product browsing, cart management, checkout, and order management.
  - Deployed the frontend on Vercel and backend on Render with production environment configuration and CORS handling.

- **Real-Time Chat Application — MERN Stack** **GitHub**
  - Developed a full-stack real-time chat application using the MERN stack for secure and interactive user communication.
  - Implemented user authentication and JWT-based authorization to protect application resources and user access.
  - Built real-time communication functionality using WebSocket technology for instant message delivery.
  - Developed RESTful APIs using Node.js and Express.js and integrated MongoDB for persistent user and chat data.
  - Designed a responsive React.js frontend and integrated it with backend APIs and the real-time communication layer.
  - Deployed the application using Vercel and Render with production environment configuration.

Technical Skills

- **Programming Languages**: C, C++, Java, JavaScript, C#, PHP, Python, SQL, R
- **Frontend Technologies**: React, Next.js, Angular, Tailwind CSS, HTML5
- **Backend Technologies**: Node.js, Express.js, FastAPI, RESTful APIs
- **Databases**: MySQL, SQLite, Redis, Oracle Database, MongoDB
- **Tools & Platforms**: Git, GitHub, Vercel, Render, Cloudinary, Visual Studio Code, Trello

Certifications

- **Cisco Networking Academy**
  IT Essentials – PC Hardware and Software *Issued: June 2022*
  - Validated foundational knowledge of computer hardware, operating systems, networking fundamentals, and troubleshooting.
